white pebble path

children's recital:  
the land in the mist

mist is one of the most fascinating phenomena in the landscape. it turns everything soft and makes the landscape seem endless.

soft garden is made of this experience: the centre of the garden is an artificial fog. repeating geometric earth mounds define an artificial landscape. the mounds are covered with Prairie Smoke and Lovers-in-the-Mist. pink and white Smoke trees surround the fog.

small white pebble paths invite you to get to the fog, zigzagging your way in between the earth mounds. there is no route, there is no beginning, no end.

just a soft garden.
